

Thème 2 — Corrigé • Niveau Facile

Corrigé 1 — la partie électronique d'un couple

$n = \text{n.o.}(\text{Ox}) - \text{n.o.}(\text{Red})$; les électrons vont du côté de l'oxydant.

Corrigé 2 — demi-équations sans oxygène

On équilibre les atomes, puis les électrons pour égaliser la charge.

Corrigé 3 — demi-équations avec oxygène, en milieu acide

Charge : gauche $-1 + 4 - 3 = 0$, droite 0. ✓

Charge : gauche $-2 + 4 - 2 = 0$, droite 0. ✓

Corrigé 4 — additionner deux demi-équations

Corrigé 5 — repérer les ions spectateurs
